Tsutomu **Suzuki**, Ph.D.

Professor,
Department of Toxicology,
Faculty of Pharmaceutical Science,
Hoshi University
2-4-41 Ebara, Shinagawa-ku, Tokyo 142-8501, Japan
Tel/Fax: +81-3-5498-5831
Email: suzuki@hoshi.ac.jp

Field of expertise: drug dependence, analgesia, pharmacogenetics, neurobehavioral toxicology
"Research theme" (source: http://souyaku.hoshi.ac.jp/dokusei/Eng/dokusei.htm):

"Studies on drug dependence and neuropsychotoxicity of environmental endocrine disruptors. Especially dealing with the following themes: mechanisms of dependence on opioids, CNS depressants and psychostimulants in rodents; and effect of environmental endocrine disruptors on somatomotor, neuromotor, sensory and cognitive functions in rodents."

Note: Attached please find his "CV" I have constructed based on my knowledge (2 pages). Attached please also find his publication list I could come up with through the PubMed search, which is limited to the publications from 1987 to date (Hoshi Univ.: 138 publications, pages 1-19; other affiliation: 9 publications, pages 20 and 21). I think the list is relatively thorough for the period but he would certainly have more publications than listed.
